

## Administering Medications to Students

School personnel may not administer prescription or nonprescription medications to students unless appropriate administration cannot reasonably be accomplished outside of school hours.

Medication may be administered to students by school personnel whom a registered nurse has trained and delegated the task of administering such medication. For purposes of this policy, the term “medication” includes both prescription medication and nonprescription medication, but does not include medical marijuana.

Student possession, use, distribution, sale or being under the influence of medication inconsistent with this policy will be considered a violation of Board policy concerning drug and alcohol involvement by students and may subject the student to disciplinary consequences, including suspension and/or expulsion, in accordance with applicable Board policy.

*NOTE: The following paragraph contains language stating the Board has adopted a policy regarding the administration of medical marijuana to qualified students. State law requires school districts to allow “primary caregivers” to administer medical marijuana to qualified students on school property, on a school bus or at a school-sponsored event. C.R.S. 22-1-119.3(3)(d)(I). State law permits boards to adopt a policy regarding “who may act as a primary caregiver” and establishing “reasonable parameters” upon the administration and use of medical marijuana. C.R.S. 22-1-119.3(3)(d)(III). State laws also permits schools to adopt policies authorizing designated school personnel to administer medical marijuana to qualified students. C.R.S. 22-1-119.3(3)(d.5)(IV). Federal law regards any form of marijuana as a controlled substance. Given that federal law regards marijuana as illegal, CASB highly recommends that the Board adopt a policy establishing parameters upon caregiver administration of medical marijuana to qualified students and prohibiting staff administration of medical marijuana, unless the staff member is the student’s parent/guardian. That way, the Board’s policies will be consistent and clear regarding when the how the administration of medical marijuana to qualified students is permitted.*

The administration of medical marijuana must be in accordance with the Board’s policy on administration of medical marijuana to qualified students.

The term “nonprescription medication” includes but is not limited to over-the-counter medications, homeopathic and herbal medications, vitamins and nutritional supplements.

*NOTE: CASB sample policy JLCDB\*, Administration of Medical Marijuana to Qualified Students, defines “medical marijuana as cannabis products with THC concentration greater than 0.3 percent, in accordance with state and federal law. As a result, administration of cannabis products with a THC concentration of .0.3 percent or less to students is covered by this policy, not CASB sample policy JLCDB\*. As provided below, a local board of education may elect to limit the administration of a nonprescription cannabis product with a THC concentration of 0.3 percent or less to only those products that have been approved by the federal Food and Drug Administration.*

Medication may be administered to students only when the following requirements are met:

1. Medication must be in the original properly labeled container. If it is a prescription medication, the student's name, name of the medication, dosage, how often it is to be administered, and name of the prescribing health care practitioner must be printed on the container.
2. The school must have received written permission from the student's parent/guardian to administer the medication to the student and either:
  - a. Written permission to administer the medication from the student's health care practitioner with prescriptive authority under Colorado law; or
  - b. A standing medical order, if the medication is an over-the-counter medication such as Advil or Tylenol.
3. The parent/guardian is responsible for providing all medication to be administered to the student, unless it is an over-the-counter medication such as Advil or Tylenol.
4. The nonprescription medication is a product that has been approved by the federal Food and Drug Administration (FDA).

*NOTE 1: State law permits local boards of education to adopt a policy authorizing a student to possess and self-administer any medication prescribed by a licensed health care practitioner on school grounds, upon a school bus, or at any school-sponsored event. C.R.S. 22-1-119.3; 1 CCR 301-68, Rule 6.00. However, such policy must prohibit students from possessing or self-administering medical marijuana on school grounds or at any school-sponsored event. C.R.S. 22-1-119.3 (3)(c). A board that chooses to adopt such a policy is then exempt from the requirements of the Colorado Schoolchildren's Asthma, Food Allergy, and Anaphylaxis Health Management Act (the "Act"). C.R.S. 22-1-119.3 (5).*

*This sample policy does not permit students to self-carry any prescription medication and instead reflects the Act's requirements for self-administration of medication for asthma, allergy or anaphylaxis only. Districts should consult with their own legal counsel if they wish to permit students to self-carry and self-administer any prescription medication.*

### **Self-administration of medication for asthma, allergies, anaphylaxis, or other prescription medication**

A student with asthma, a food allergy, other severe allergies, or a related, life-threatening condition or who is prescribed medication by a licensed health care practitioner may possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or related, life-threatening condition, or other condition for which the medication is prescribed. Self-administration of such medication may occur during school hours, at school-sponsored activities, or while in transit to and from school or a school-sponsored activity. Student possession and self-administration of such medication must be in accordance with the regulation accompanying this policy.

Authorization for a student to possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or other related, life-threatening condition, or other condition for which the medication is prescribed may be limited or revoked by the school principal after consultation with the school nurse and the student's parent/guardian if the student demonstrates an inability to responsibly possess and self-administer such medication.

### **Use of stock epinephrine auto-injectors in emergency situations**

The district will have a stock supply of epinephrine auto-injectors for use in emergency anaphylaxis events that occur on school grounds. Any administration of a stock of epinephrine auto-injector to a student by a district employee must be in accordance with applicable state law, including applicable State Board of Education rules.

The district's stock supply of epinephrine auto-injectors is not intended to replace student-specific orders or medication provided by the student's parent/guardian to treat the student's asthma, food or other allergy, anaphylaxis or related, life-threatening condition.

The district will have a stock supply of opiate antagonists to assist a student who is at risk of experiencing an opiate-related drug overdose event. For purposes of this policy, an opiate antagonist means naloxone hydrochloride or any similarity acting drug that is not a controlled substance and that is approved by the federal Food and Drug Administration (FDA) for the treatment of a drug overdose.

The stock supply of opiate antagonists may also be used to assist a district employee or any other person who is at risk of experiencing an opiate-related drug overdose event.

Administration of an opiate antagonist by a district employee to a student or any other person must be in accordance with applicable state law.
